

It is the policy of Four Rivers Nuclear Partnership, LLC (FRNP) to conduct the Deactivation and Remediation of the Paducah Gaseous Diffusion Plant (PGDP) in a safe, compliant and cost-effective manner that protects human health and the environment. We achieve this by integrating environmental requirements and pollution prevention into our work planning and execution, and taking actions to minimize the environmental impacts of our operations. We establish and communicate environmental responsibilities, provide environmental training to our workforce, and implement controls to mitigate environmental hazards. These activities are conducted in accordance with our Environmental Management System (CP2-ES-0101). Through employee involvement and our management's commitment to environmental excellence, we will:

- Identify and comply with all applicable environmental laws and regulations.
- Use practicable means to minimize or eliminate the generation of new wastes without a path for disposition.
- Protect the natural, biological and cultural resources associated with the PGDP and surrounding DOE-owned property.
- Conserve natural resources by reusing and recycling materials, purchasing recycled materials, and using recyclable materials.
- Establish documented environmental objectives and targets and update them as necessary to reflect FRNP's needs, missions, and goals.
- Involve our stakeholders when weighing an environmental course of action.
- Monitor our impact on the environment and measure our performance, and communicate the results to our employees, subcontractors, and stakeholders.
- Continuously improve our environmental management system through self-assessment and corrective action process.
- Communicate this policy to all employees and subcontractors and make it available to the public and our stakeholders.

This policy applies to all persons working on behalf of FRNP at the PGDP. Every employee and subcontractor has ownership of this policy and is responsible to report environmental concerns to management. Managers shall promote environmental stewardship, take prompt action to address concerns and issues and have zero tolerance for noncompliance.

Myrna Redfield, Program Manager
